Impulse Elliot Wave Targets

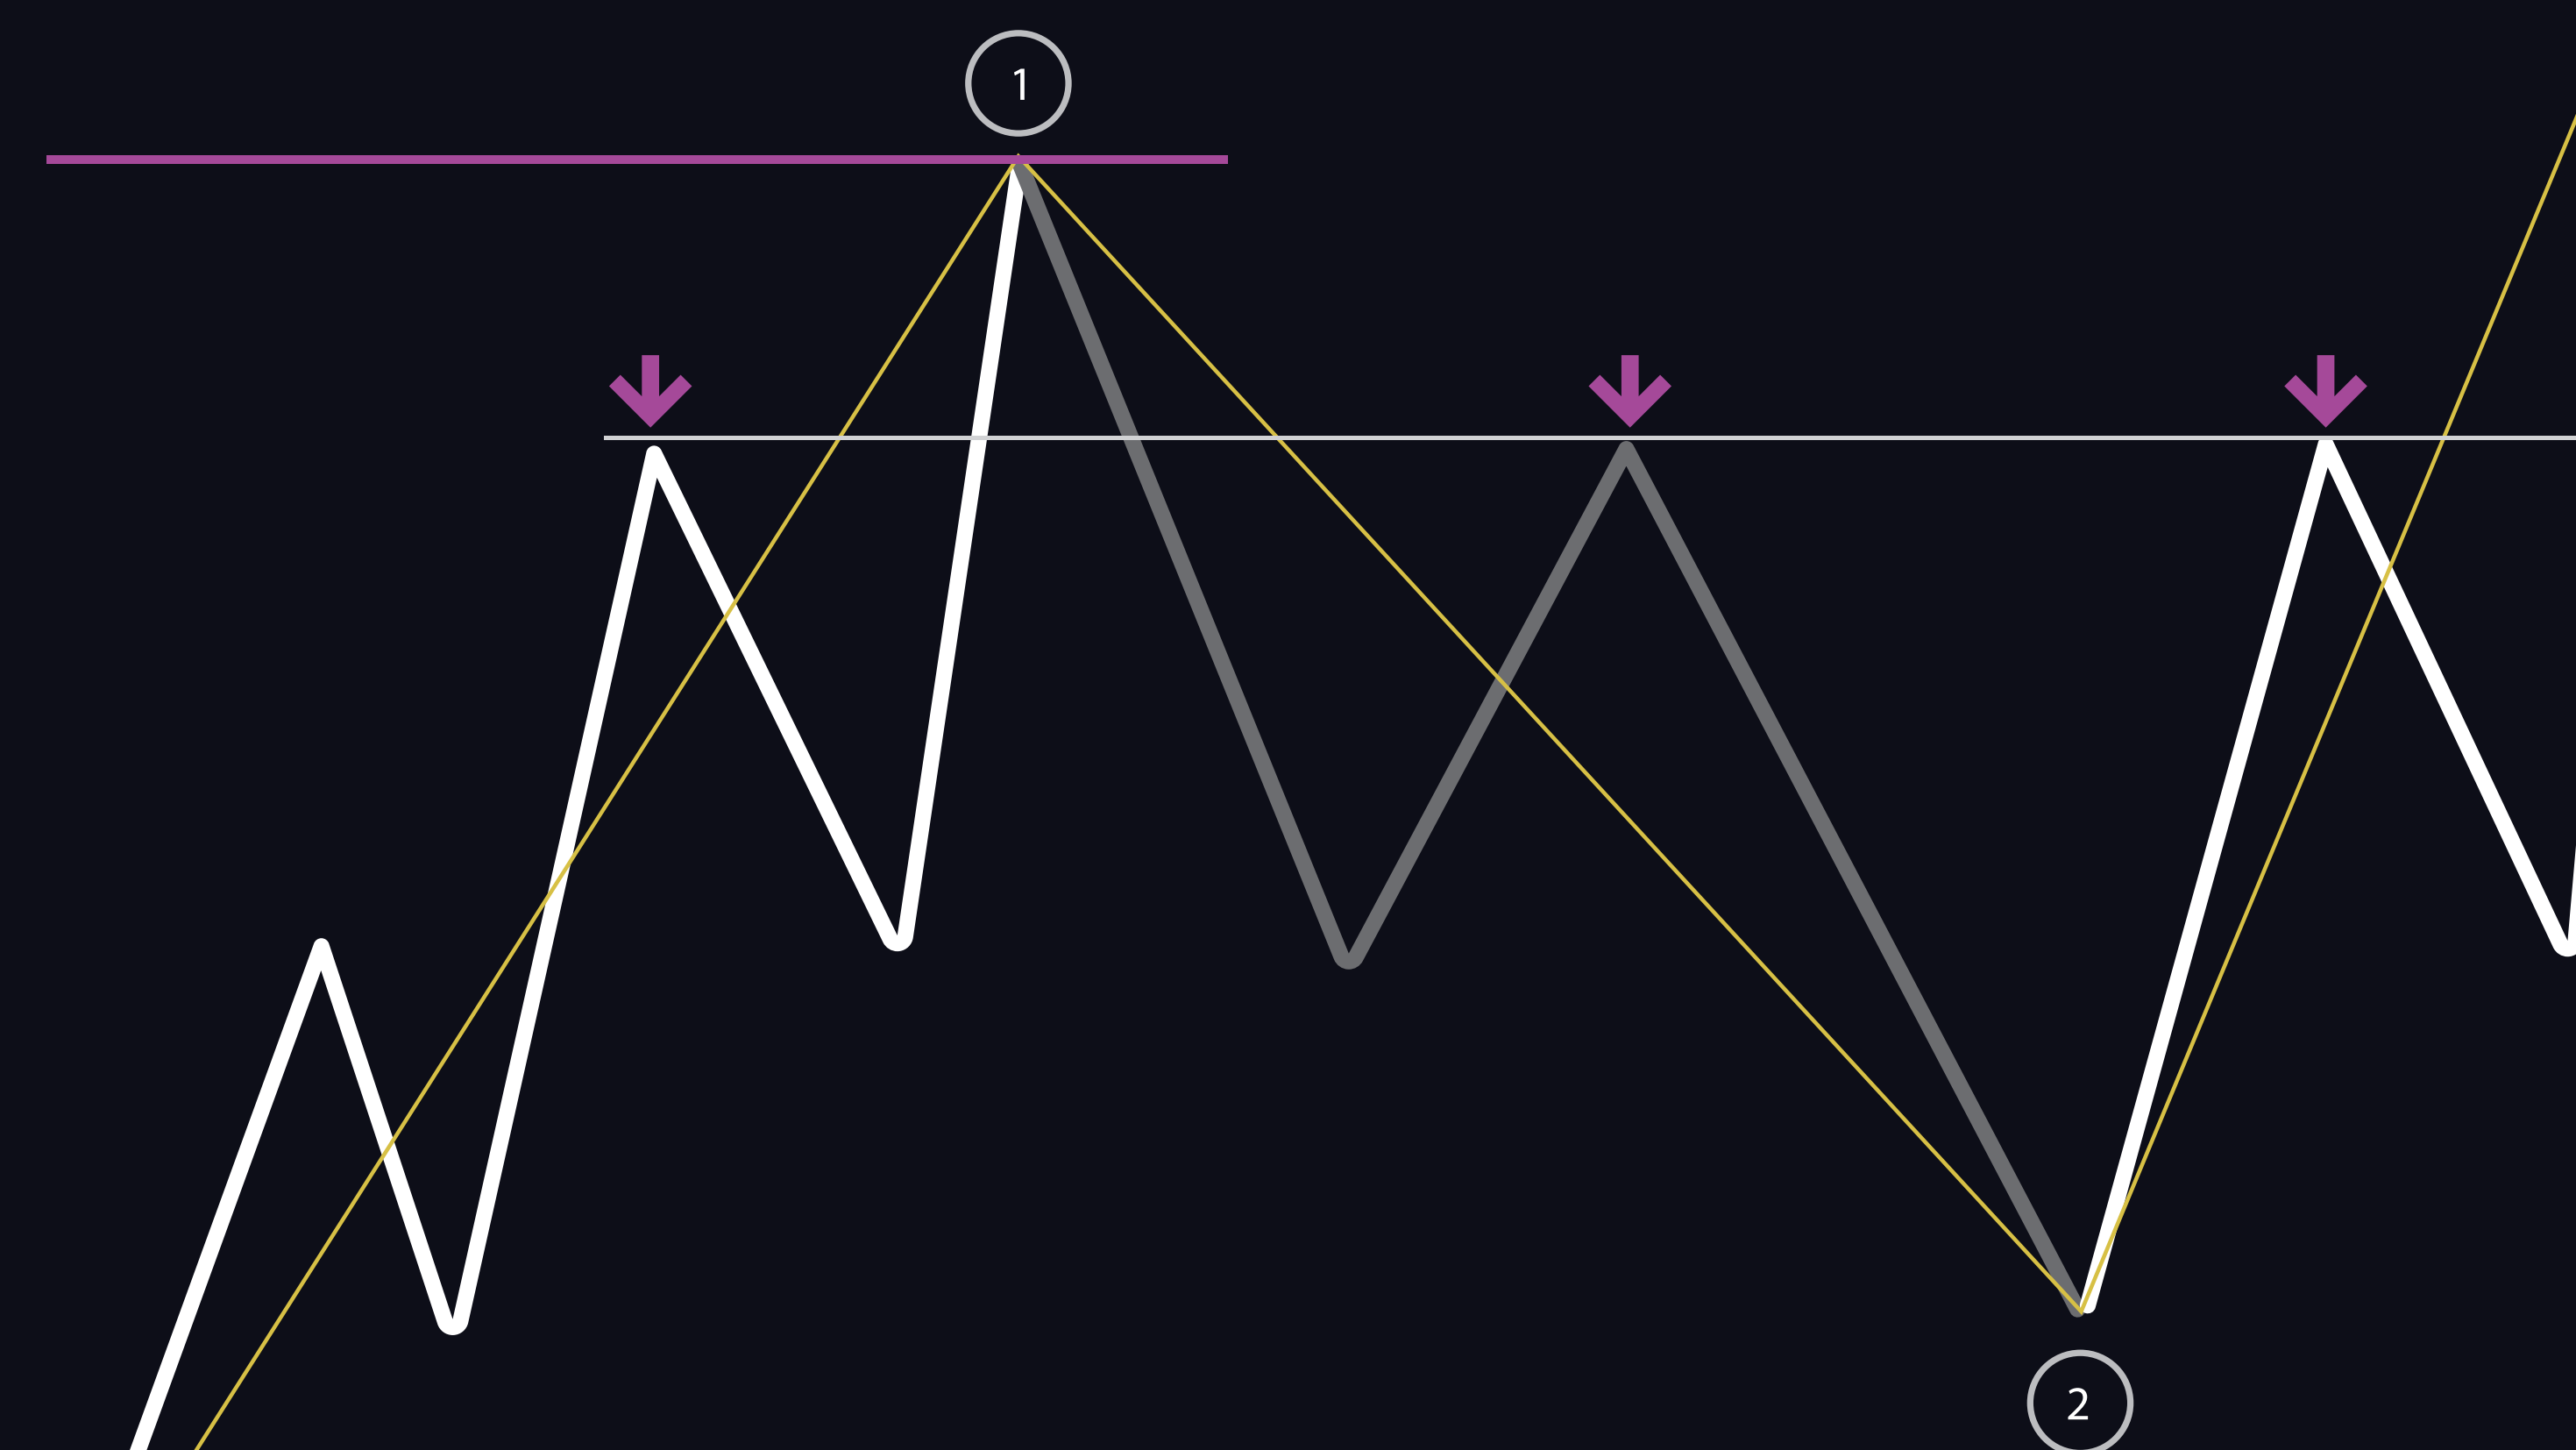

This is the standard wave pattern with no extensions. Here you can see how to get targets for wave 3 and 5 and how wave 2 and 4 are correlated.

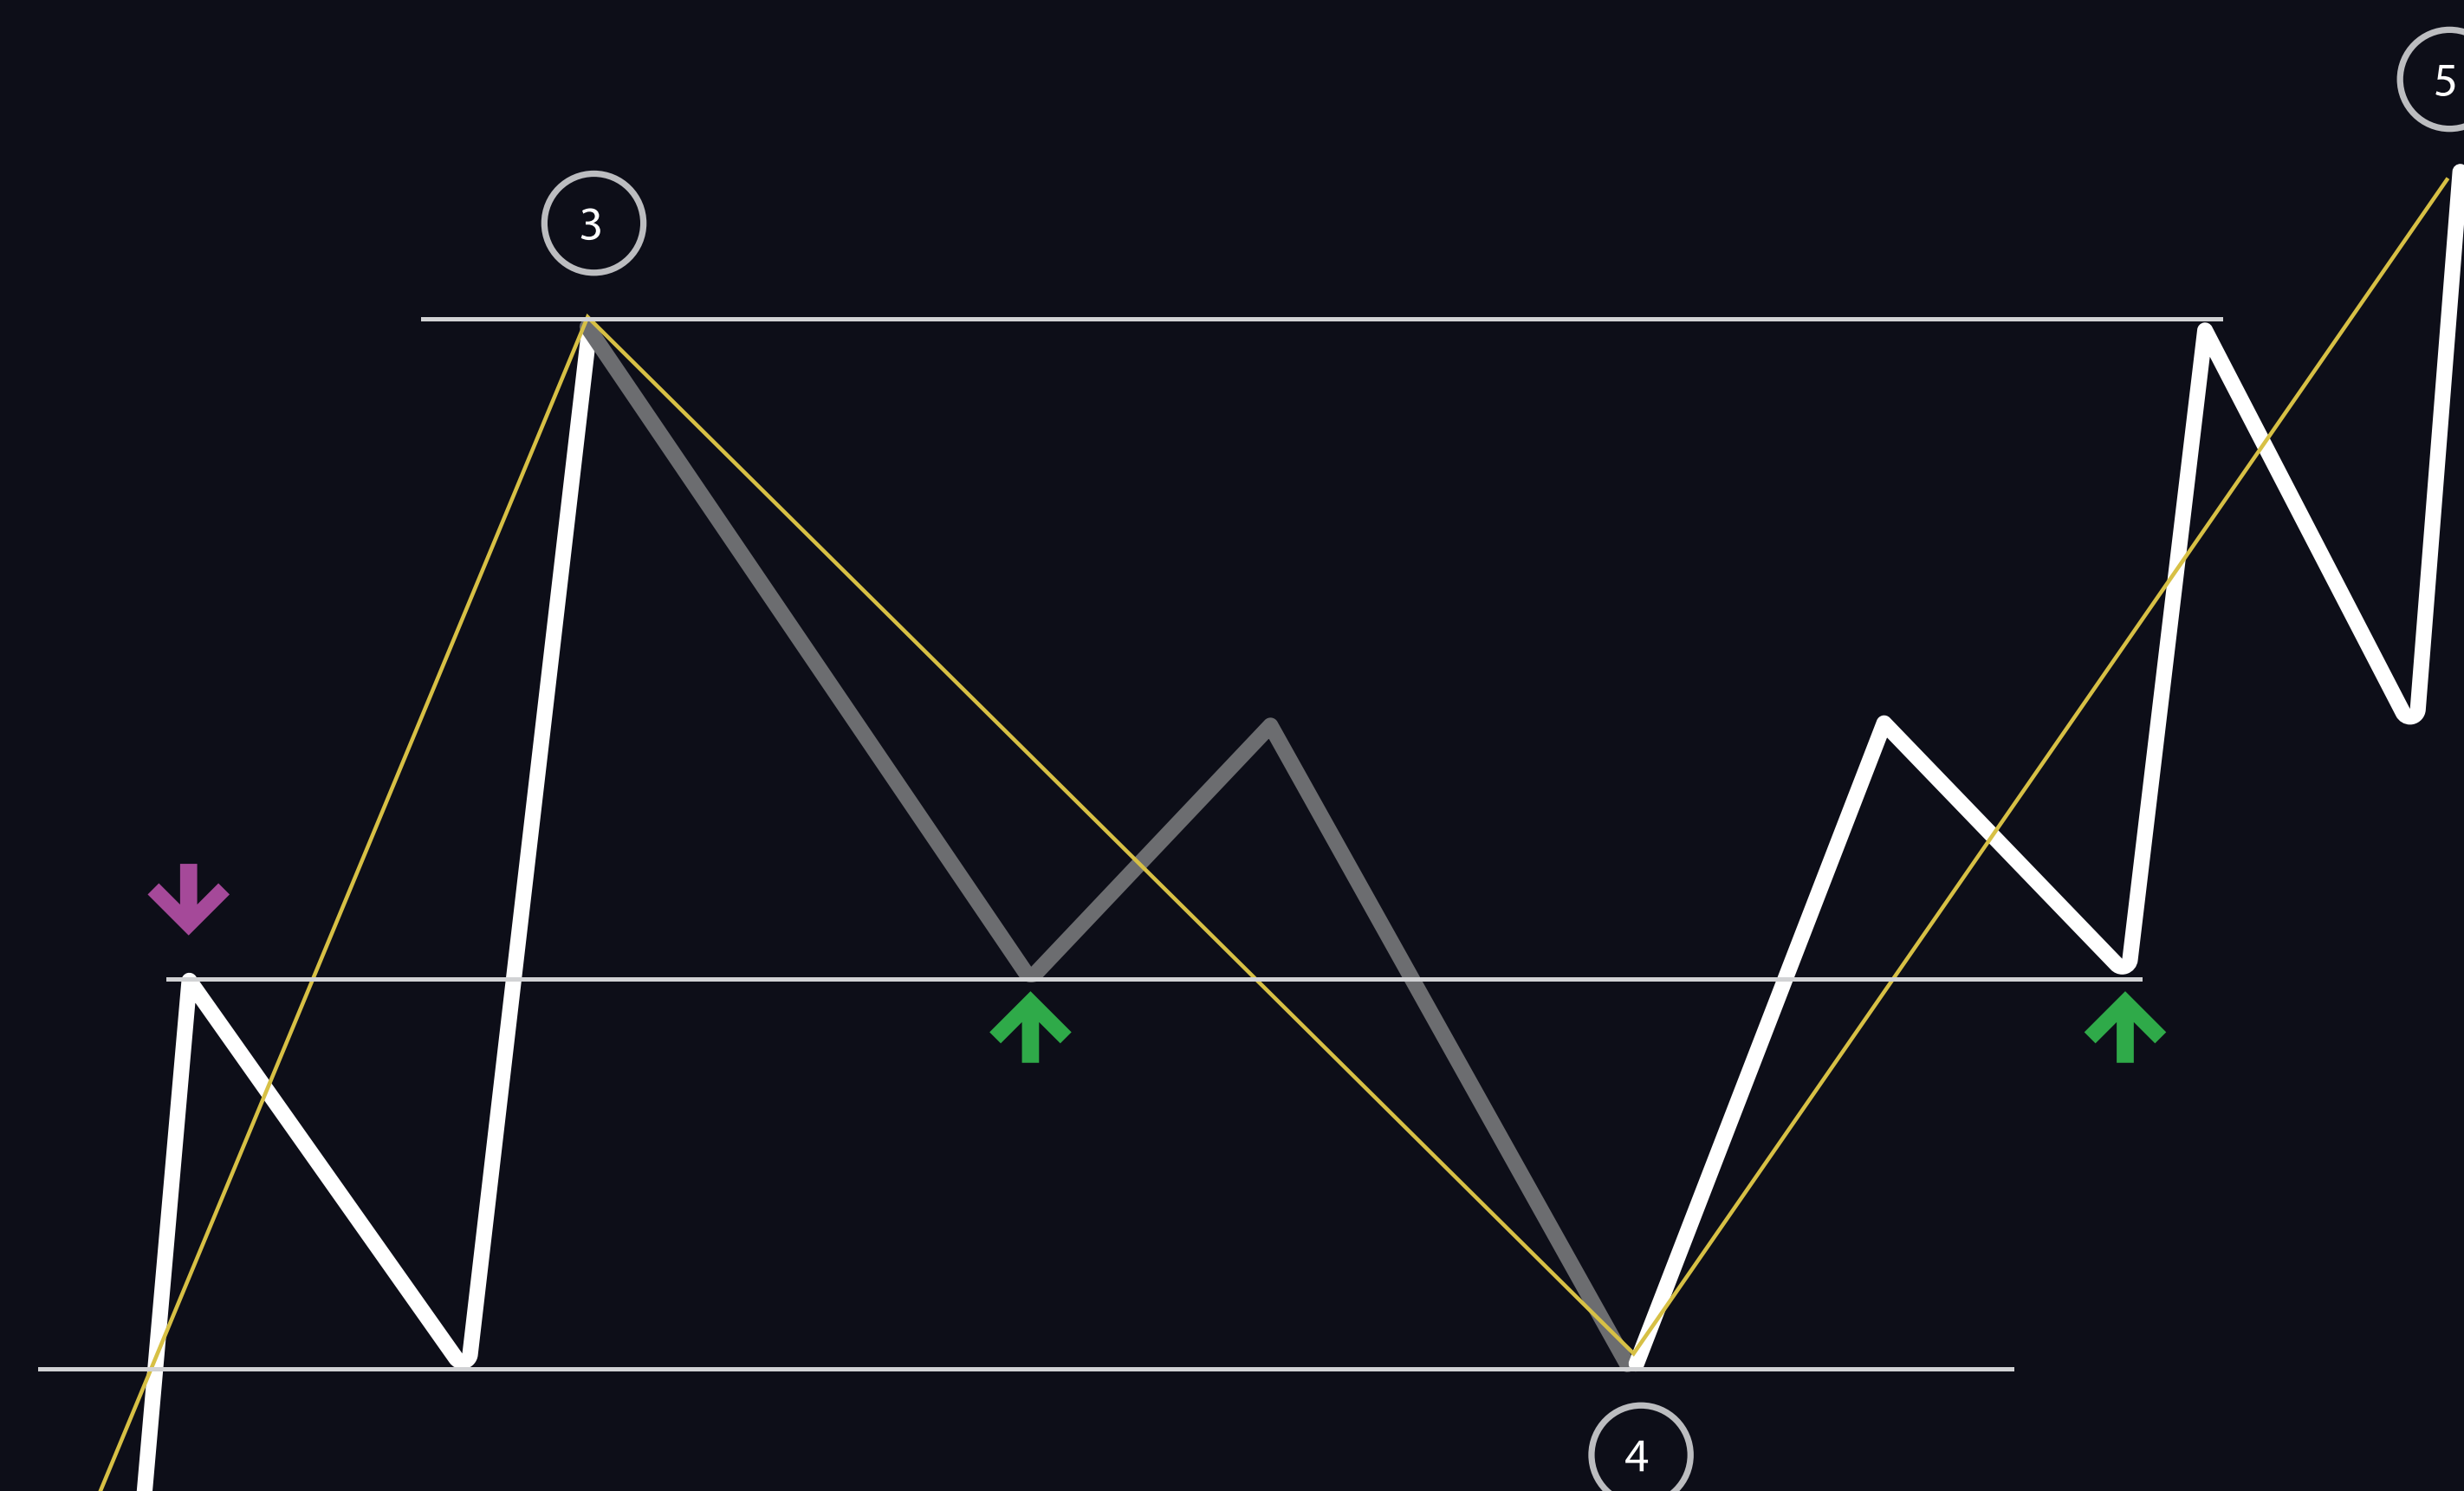

Elliot Wave S/R Flip

The 5-3-5-3-5 subwaves of an impulse normally find support / resistance from old sub wave horizontal levels.

eg. Old subwave 3 high of Wave 1 in turn will be resistance for subwave B of Wave 2 and then subwave 1 of Wave 3.

eg. Old subwave 3 high of Wave 3 turns into support for sub, wave A of Wave 4 and then subwave 2 of Wave 5.

Elliott Wave sub waves of an impulse normally find support/resistance off of old sub wave horizontal levels.

S/R = Support / Resistance
EW = Elliot Waves
